

**Hello.**

**Thank you for considering Windtech Audio Inc. as your audio solutions partner!**

In the following pages, you'll learn about Windtech Audio, our expertise in high-performance microphone windscreens and accessories, and our 40-year legacy of delivering exceptional, American-made products with SonicFoam™ technology. We're committed to meeting your needs with precision.

As you review this proposal, please share your feedback. When you're ready, we'll ensure your audio experience exceeds expectations.

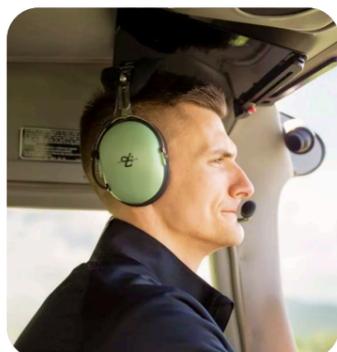

Thank you for this opportunity—we look forward to collaborating!

**Windtech has been a valued vendor partner to work with. Consistently delivering high quality products with little to no wait time which from a supply chain perspective is extremely valuable.**

**Kim Hilton**

Buyer, Office Manager | Earthworks Audio

 **Made in America**

Our windscreens, crafted from our specially developed American-made SonicFoam™—a hypo-allergenic, open-cell acoustic foam—allow sound energy to pass freely without altering the microphone's frequency response. Designed for acoustic transparency, they effectively reduce wind velocity, minimizing wind noise, pop sounds, and breath interference.

**At WindTech Audio we exist to empower the world with clarity.**

At our core, we uphold trust and excellence in every product we create and every relationship we build.

- **We listen to our clients** and design solutions that empower their unique needs.
- **We prioritize precision and quality**, ensuring every voice is heard with unmistakable clarity.
- **We foster meaningful interactions** by bridging distances and enhancing communication.

**Our mission at Windtech Audio** is to revolutionize global communication by designing high-performance microphone windscreens and accessories that deliver exceptional sound quality, while dedicating ourselves to achieving precisely what each customer desires.

**Enhanced Audio, Customer focused.**
